Capability Release Recommendation to Use the Hospira GemStar Infusion Pump List 13087-04-01							20080226

SUMMARY

- PURPOSE.** To provide Air Mobility Command with a Capability Release Recommendation to Use the Hospira GemStar Infusion Pump List 13087-04-01 on the C-130J and WC-130 fleet.
- BACKGROUND.** The 657th Aeronautical Systems Squadron (657 AESS) Engineering has reviewed the technical (airworthiness and performance) requirements and data on the Hospira GemStar Infusion Pump List 13087-04-01 and determined there are no safety of flight issues associated with its use on the C-130J and WC-130J fleet.
- LIMITATIONS.** The 866th Aeronautical Systems Group does not require any restrictions to use the Hospira GemStar Infusion Pump List 13087-04-01 on the C-130J and WC-130J fleet. It should be noted that the Hospira GemStar Infusion Pump's low operational temperature is limited to 5 degrees C due to fluids freezing at low temperatures. However, this limitation is a device use limitation, not a C-130J or WC-130J airworthiness issue.
- VIEW OF OTHERS.** N/A.
- RECOMMENDATIONS.** Recommend releasing the Hospira GemStar Infusion Pump List 13087-04-01 for use on the C-130J and WC-130J fleet. In order to preserve the Airworthiness Certification (and to ensure safe operations of the aircraft), alterations, configuration changes or modifications to these aircraft are prohibited without prior approval of the 657 AESS Chief Engineer. If the units require C-130J technical assistance at any time after the subject capability is fielded, they are to use the United States Air Force Automated Inspection, Repair, Corrosion & Aircraft Tracking System at <https://c130aircat.robins.af.mil>.
